

JDSU On-Site Service

Certifies quality at your door

Key Features

- Extend life of test instruments
- Eliminate shipping costs and reduce downtime
- Maintain equipment and prevent problems

Applications

- Calibrate JDSU instruments
- Calibrate other original equipment manufacturer (OEM) devices from vendors other than JDSU
- Calibrate RF and optical equipment

The JDSU On-site Service delivers the convenience of a highly skilled technician deployed directly to a customer location to perform services that improve your equipment or ensure its optimal functionality. The On-site Service offering eliminates extensive shipping and insurance charges that accumulate from sending out equipment for routine maintenance. Combine this benefit with minimizing downtime and the result is an immediate return on investment. JDSU will advise you when service is due to help manage the service requirements for your equipment. To minimize disruptions in work flow, you can plan ahead to calibrate your fleet of field test equipment simultaneously with the scheduled maintenance of your JDSU systems.

As advanced network technology (cable, TELCO, and fiber) continues to advance with the proliferation of next-generation triple-play services, the demand steadily increases for new testing requirements. JDSU is ideally positioned to help you stay on track with your calibration requirements and can inform you of the latest options for your equipment. For faulty or damaged equipment, JDSU can arrange for shipment directly back to the factory for expedited repair, for both JDSU and OEM equipment.

JDSU On-Site Service Certifies quality at your door

JDSU On-Site Service Helps your business and proves its value

Save money

- Extend the useful life of test instruments
- Eliminate shipping and insurance costs and receive nearly 30-percent return on investment
- Reduce downtime
- Maintain equipment and prevent problems

Make better use of your equipment

- Faulty equipment can be expedited for Factory repair
- Calibrate non-JDSU equipment
- Receive assistance managing service requirements
- Obtain standard service warranty

Performing regular calibration of equipment ensures the accuracy its measurements. Improper calibration, however, can compromise a network and impact services. Keeping your equipment in top-running shape with the JDSU On-site Service helps ensure your network will continue to operate at peak performance. It is the most cost-efficient and effective way to maintain equipment on a timetable that meets your requirements.
